David and Peter,

de maximis, inc. is submitting this additional response on behalf of the Cooperating Parties Group (CPG). It is our understanding that this submittal provides all the remaining information and certifications you requested on April 23-24. It consists of signed and sealed letters from Frey Engineering who reviewed the cap design specifications from a flooding hazard perspective, accompanied by a letter from Moffatt & Nichol explaining their derivation of a Manning coefficient for the Removal Area sediment. Five originals of these letters are being sent to NJDEP by Federal Express for Thursday morning delivery.

Also, just to make sure you received my earlier response, the Clean Earth facility that will be utilized is Lot 70 Block 287 with a physical address of Clean Earth Dredging Technologies – Koppers, 1 Fish House Road, Kearny NJ 07032.

If you have any questions, please contact Bill Potter or me at (908) 735-9315.

Stan Kaczmarek, PE

Stan –

Please be advised that your deadline to supply

previously requested items was last Friday 4/19.

All outstanding items requested must be received by 9:00 AM tomorrow 4/25 to enable the Department time to review and complete its decision.

Subject: Re: Clean Earth Address

It will be only the Kearny facility:

Clean Earth Dredging Technologies – Koppers 1 Fish House Road, Kearny NJ 07032

i don't have the block and lot number immediately available. Do you need it from us or can you get it from the

Clean Earth application directly?

We are working to address Pete's request.

Stan

Stan —

Please provide the complete address including Block & Lot of the DM processing facility also will it be the Kearny or Jersey City locus? If it's both provide both.

Also have you addressed the FHA items as specifically requested by Pete DeMeo?

Time is of the essence.
